4. Introduction

This Business Requirements Document (BRD) defines the business needs, objectives, scope, and high-level requirements for developing an Online Product Ordering and Inventory Management System for an electronics store.

4.1 Business Goals

- Enable online sales of electronic products
 - Improve customer convenience through home delivery
 - Automate inventory stock management
 - Increase business reach and revenue
-

4.2 Business Objectives

- Launch a fully functional e-commerce website
 - Reduce inventory-related errors
 - Improve order processing efficiency
 - Provide real-time stock visibility
-

4.3 Business Rules

- Orders can be placed only if stock is available
 - Payment must be successful to confirm an order
 - Inventory must update automatically after order placement
 - Only authorized admin users can modify inventory
-

4.4 Background

The electronics store currently operates through offline sales. Inventory is tracked manually, leading to inefficiencies, stock mismatches, and limited business growth. To remain competitive, the store plans to adopt a digital sales channel.

4.5 Project Objective

To design and implement an online ordering platform integrated with an automated inventory management system that supports business growth and operational efficiency.

4.6 Project Scope

4.6.1 In Scope Functionality

- Customer registration and login
- Online product catalog
- Cart and checkout
- Online payment integration
- Order tracking

- Automated inventory updates
 - Admin dashboard and reports
-

4.6.2 Out Scope Functionality

- AI-based demand forecasting
 - Multi-warehouse inventory management
 - Loyalty programs
 - Automated refunds (future phase)
-

5. Assumptions

- Internet connectivity is available
 - Product and inventory data provided is accurate
 - Payment gateway approval will be completed on time
-

6. Constraints

- Fixed project timeline and budget
 - Waterfall methodology followed
 - Limited technical staff
-

7. Risks

Technological Risks

- Payment gateway integration failure
- Server downtime

Skills Risks

- Limited technical expertise of store staff

Political Risks

- Stakeholder decision delays

Business Risks

- Low customer adoption initially

Requirements Risks

- Incomplete or unclear requirements

Other Risks

- Data migration issues
-

8. Business Process Overview

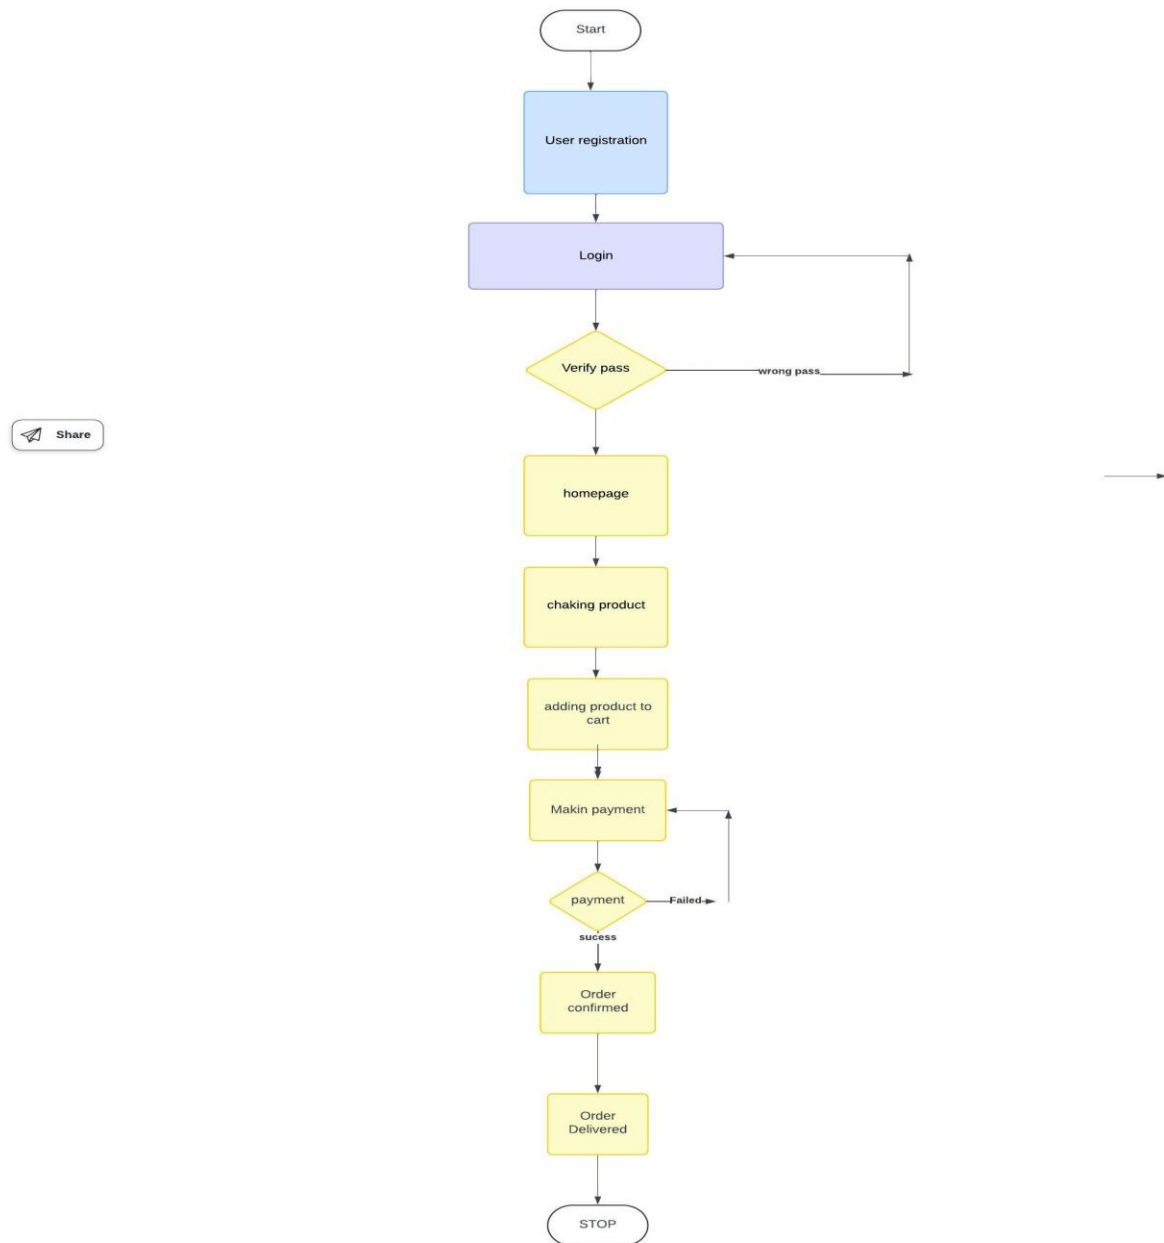

8.1 Legacy System (AS-IS)

- Manual billing and order processing
- Manual inventory updates
- No real-time stock visibility

- Offline-only customer interaction

8.2 Proposed Recommendations (TO-BE)

- Online product browsing and ordering
- Automated stock updates
- Digital payments and order tracking
- Centralized admin control

9. Business Requirements

BR ID	Requirement Description
BR-01	The system shall allow customers to register
BR-02	The system shall allow customers to log in
BR-03	The system shall allow Admin to register
BR-04	The system shall allow Admin to log in
BR-05	The system shall allow Admin to manage Inventory
BR-06	The system shall allow customers to order products online
BR-07	The system shall automatically update inventory after each sale
BR-08	The system shall support online payments
BR-09	The system shall provide order tracking
BR-10	The system shall generate inventory and sales reports

10. Appendices

10.1 List of Acronyms

Acronym Description

BRD	Business Requirements Document
UAT	User Acceptance Testing
RASCI	Responsible, Accountable, Support, Consulted, Informed

10.2 Glossary of Terms

Term Definition

Inventory	Stock of products available for sale
E-commerce	Online buying and selling of products
